Water Exercise is a physical activity requiring rapid and strenuous physical movement, and aggressive contact with other participants or equipment can occur as well as internal trauma to various parts of the body. Rules and supervision are utilized to prevent or reduce the likelihood of physical injury. However, injuries, including those to the muscle, skeletal, circulatory, and nervous systems, can occur. Facilities and equipment are not certified to be totally free from flaw, neither are administration and supervision certified to be without flaw. Under certain circumstances, flaws in any of these areas could contribute to a potential injury.
