### Special Event Guidelines for Planning During the COVID-19 Response

### Introduction:

The novel coronavirus that causes coronavirus disease 2019 (COVID-19) is most commonly spread through person-to-person close contact (within about 6 feet). Current evidence suggests that the coronavirus may also remain viable for hours to days on surfaces made from a variety of materials. Social distancing practices and cleaning of surfaces, followed by disinfection, are best practice measures for prevention of COVID-19 and other viral respiratory illnesses in community settings. Other best practices include symptom screening and enhanced food service safety practices.

### **Guidelines:**

In addition to the standard special event and race applications required by the City of Oak Ridge when evaluating requests for event permits, applicants are now required to provide a plan for addressing infection prevention practices that will be in place during community events. Plans should include safe practices for event organizers, participants and others who may be present in the event area. Completion of the questions below may be used to fulfill the Special Event and Race application Safe Practices requirement. This requirement will be in place until further notice.
